

Rullo Costirpatore

in ghisa unica sezione portato e trainato
Serie RGP/T

Rullo costipatore in ghisa unica sezione portato e trainato

Indispensabile per la preparazione raffinata dei terreni per la semina. Usata dopo la semina, forma nel terreno tanti piccoli tagli che riducono la formazione della crosta favorendo la nascita della pianta in tempo reale. Il modello RGP/T è trasformabile da portato a trainato.

Mounted and trailed monoaxle cast iron roller

These are indispensable for the refined preparation of soil before sowing. Used after sowing it forms numerous small incision of crust and accelerate the germination.
